High Quality Custom Flexible Piping Systems

Thorburn Flex offers unmatched capabilities and expertise in applications engineering, design development and manufacture of custom flexible piping systems for CANDU nuclear power plants. Operating under a strategy of global presence, Thorburn Flex has structured and developed a specific CANDU business unit used to service this niche market sector. Through this CANDU business unit, our nuclear products consistently meet and exceed all quality design requirements of our CANDU nuclear reactor business partners.

Metallic Expansion Joints

Thorburn Flex designs and manufactures custom metallic expansion joints for main steam penetration, spent fuel bay interconnecting piping, turbine crossover, steam lines, boiler feed pumps & treated water lines, meeting requirements for ASME Sec III/CSA N285.0 Classes 1, 2, 3 & 6.

Rubber Expansion Joints

Thorburn Flex designs & manufactures rubber expansion joints for raw service water, circulating water cooling and circulating water service piping critical to the operation of a nuclear reactor, meeting requirements for ASME Section III/CSA N285.0 Class 6.

Metallic Bellows

Thorburn Flex designs and manufactures custom bellows for the fuelling channel annulus seals, loop liner tubes, penetration seals & heat exchangers in nuclear reactors, meeting requirements for ASME Sec III/CSA N285.0 Classes 1, 2, 3 & 6.

Miniature Bellows

Thorburn Flex designs and manufactures custom seamless drawn over mandril & hydroformed bellows for sampling in a nuclear reactor, snout indexing mechanism, fuel rod flask limit switch & rod cup seal, reactivity mechanism, meeting requirements for ASME Sec III/CSA N285.0 Classes 1, 2, 3 & 6.

Fueling Machine Head Separator Bellows

Thorburn Flex designs and manufactures custom nickle deposit & hydroformed flexible fittings for linear potentiometer and F/M head separator assemblies, meeting requirements for ASME Sec III/CSA N285.0 Classes 1, 2, 3 & 6.

CANDU NUCLEAR

Hose Assemblies

Thorburn Flex designs and manufactures custom metallic & rubber hose assemblies for catenary, fueling machine, ion exchanger, core feeder, D₂O primary & auxiliary transfer service meeting requirements for ASME Section III/CSA N285.0 Classes 1, 2, 3 & 6.

NT52 Cryogenic Couplings

Thorburn Flex designs and manufactures non-valved quick couplings for liquid nitrogen service in radioactive environments, meeting requirements for ASME Section III/CSA N285.0 Classes 1, 2, 3 & 6.

NT92 D₂O Resin Couplings

Thorburn Flex designs and manufactures ball valved quick couplings for nuclear fueling machines, D₂O resin transfer, D₂O primary & auxiliary systems and core feeder systems, meeting requirements for ASME Section III/CSA N285.0 Classes 1, 2, 3 & 6. NT92 couplings are designed for vacuum and low pressure applications.

NS71 Dry Break Quick Couplings

Thorburn Flex designs and manufactures valved and non-valved quick couplings for nuclear fueling machines, D₂O primary & auxiliary systems and core feeder systems, meeting requirements for ASME Section III/CSA N285.0 Classes 1, 2, 3 & 6. NS71 couplings are perfect for use where space is limited and are designed for high pressure applications.

Thorloc Pipe Clamp Connectors

Thorburn Flex designs and manufactures pipe clamp connectors which provide an alternative to pipe flanges and are ideal where space, weight and joint integrity are critical requirements in a nuclear reactor, meeting requirements for ASME Section III/CSA N285.0 Classes 1, 2, 3 & 6.

Custom Assemblies

Thorburn Flex designs and manufactures custom adapters for D₂O discharging and loading transfer, plumb-up of fueling machine, catenary ion exchanger & panametric connections, meeting requirements for ASME Sec III/CSA N285.0 Classes 1, 2, 3 & 6.
