

Flexible Piping Systems For Metal Processing

Thorburn Flex Inc

Flexible Piping Specialist

Thorburn, since its conception 50 years ago, has become a world leader in the design and manufacturing of custom engineered flexible piping and ducting systems. Operating under a strategy of global presence in the Petrochemical and Power Generating Industries, Thorburn is structured to consistently meet and exceed customers expectations in quality, value and service.

Thorburn offers unmatched capabilities and expertise in applications, Engineering, Design and Manufacturing of leading end flexible piping and ducting systems. Targeting Thorburn's resources allows its core technology to be leveraged into hundreds of demanding applications.

FEA (Finite Element Analysis) assist in design & analysis for critical applications.

inline Pressure Balanced Expansion Joint

Elbow Pressure Balanced Expansion Joint

High Core Bellows Expansion Joint

Conductive & Non-Conductive Furnace Door Hose Assemblies

Flue Gas Corrosion Resistant Ducting Expansion Joint

Rubber inline Pressure Balanced Expansion Joint

Rubber PTFE Lined Expansion Joint

PTFE Lined Hose Assemblies

Our Company is known by its products but our success is the result of our employees and partners combined capabilities, building value and working toward excellence to keep our customers satisfied.
